

MHD copper trunks with copper cartridge

Copper trunk

for use in the MHD subracks 1U and 3U
shielded, suitable for 10GBase-T

MHD copper trunk with pre-assembled copper cartridge (6x RJ45) on both sides

Description

Shielded copper trunk cable with pre-assembled copper cartridges for the transmission of all applications up to 10 Gbit/s, especially in data centres.

The copper cartridges can be installed in the MHD subracks 19"/1U or 19"/3U.

The 6-fold TP trunk cable (6x CU 7002 4P) is directly connected to the copper cartridges via LSA plus contacts.

Application

This solution provides data centres with the flexibility to perform all changes very quickly and without the need for costly on-site work. You can also achieve high packing densities, e.g. 48 copper ports in a 1U subrack.

Scope of delivery

Pre-assembled copper trunk. Delivery with measurement report.
assembled copper trunk. Delivery with measurement report.
