

Fuse module

for connection / terminal box VAD ... E30-E90

Installation fuse element

Descrizione

AC 230V fuse holder 5 x 20 mm with 2A fuse.
The built-in fuse element is screwed into 2 two steatite through clamps.

Applicazione

Branches in cable systems with integrated functional integrity according to DIN 4102-12 must be individually fused so that the short circuit of one consumer/group cannot affect the other consumers/groups. For this reason, feeders must have an outgoing fuse.
