# Distance frame
for FTTH data outlet AP 88 x 88

Distance frame for FTTH data outlet AP 88 x 88

Typical applications: above a baseboard / for retrofitting (retrofit box and cover)

Description

The distance frame is a simple solution for mounting the FTTH data outlet AP 88 x 88 above a baseboard.
It can be stacked: vertically up to two pieces, horizontally even higher numbers.
Each distance frame offers up to four cut-off recesses for Keystone modules.
The frame itself can also be cut off and therefore be mounted behind an already installed data outlet without the need to remove the fibre optic cable(s).

Applicazione

For mounting the FTTH data outlet AP 88 x 88 directly above the baseboard.
For retrofitting an aleady existing home cabling.
