

## Inhouse-Kabellösung "OTO Cover-AP"

Design in LC/APC

Complete box / retrofit kit

Pre-assembled FTTH in-house cable solution with "OTO Cover-AP" junction box, white

### Description

Pre-assembled FTTH cable, wound on environmentally friendly and recyclable blister coil.

Equipped with FTTH connection box "OTO Cover-AP" 95 x 95 mm white

The FTTH in-house junction box has an inner lid and cover with labelling windows, hood additionally with imprint "Optical Fibre" and port numbering.

Simplified pull-in thanks to pull-in hook on the cable.

### Application

FTTH in-house cabling, typically for the connection from the Building Entry Point (BEP) to the data outlet (OTO).

The patented OTO Cover-AP junction box is easy to find in case of service due to its imprint.

For renovation work, only the cover hood is removed. The OTO box with cover and labelling remains mounted on the wall. The FO connection remains protected.
