Finnova AG Bankware is one of the largest developers of bank software in Switzerland. At its new headquarters in Lenzburg the company installed a high-performance communication network by Daetwyler Cables. The network consists of a unilan® Prime Solution with PS GG45 Category 7A connector technology for each floor and pre-assembled fibre optic cables for the backbone. Fibre optic products by Daetwyler Cables were also used for cabling in the server rooms of this software development specialist. The new network promises Finnova AG performance of the highest level in software development as well as long service life and future flexibility.
